

Program : C Program to Largest of three numbers.

```
#include <stdio.h>
#include <conio.h>
void main()
{
    int n1,n2, n3;
    printf("Enter three different numbers: ");
    scanf("%d %d %d", &n1, &n2, &n3);

    if (n1>= n2 && n1 >= n3)
        printf("%d is the largest number.", n1);

    if (n2>= n1 && n2 >= n3)
        printf("%d is the largest number.", n2);

    if (n3>= n1 && n3 >= n2)
        printf("%d is the largest number.", n3);

    getch();
}
```

OUTPUT:

```
Enter three different numbers: 20 30 15
30 is the largest number.
```
